

As if we weren't green enough already.....The Order of the Friendly Sons of the Shillelagh has gone green with the implementation of "The GreenSwitch System".

The GreenSwitch System we will help us reduce our energy consumption and thus our energy expenses. Good for us and the environment.

How does it work?

The last one to leave/close the bar just slides the GreenSwitch to the off position (down).

The light on the GreenSwitch will blink back and forth from yellow to green for 30 seconds. This will allow you ample time to leave the bar.

After 30 seconds, the light will stay green and the GreenSwitch System will cut the energy to the bathroom lights, video games, TV's and bar lights we have mapped out; they will turn off automatically.

With all these devices are off.....we will be saving the club money.

Thank you for your support.
